

BADGLEY
MISCHKA
H O M E

RISK LETTER

To Our Retail Partners & Interior Design Associates,

Please note that certain Badgley Mischka Home products may be more susceptible to warping, cracking, or shrinking, and may not be suitable for all clients. When introducing our products to new clients, please inform them that many of our furniture pieces are constructed of solid wood, and therefore can still react to local climate and conditions 1-6 months after receipt.

If at any time you need suggestions for items suitable to your clients' locations, please do not hesitate to contact us. Please also keep in mind that solid wood will be affected by variations in local humidity along with increased temperature changes indoors during the winter season. Be aware that solid wood furniture is also very susceptible to sunlight. If exposed to continued sunlight the item will crack/split in time.

We appreciate your continued support of Badgley Mischka Home and look forward to working together to keep your clients happy.

Best regards,

Badgley Mischka Home
